

Instructions

First unzip the project file.

1. Goto the main directory like this:

Fiverr Buyer works > doctor_App

Name	Date modified	Type	Size
account	7/18/2022 12:17 AM	File folder	
admin	7/18/2022 12:18 AM	File folder	
chatbot	7/18/2022 12:19 AM	File folder	
doctor_App	7/12/2022 6:20 PM	File folder	
media	7/20/2022 3:46 PM	File folder	
db.sqlite3	7/12/2022 6:20 PM	SQLITE3 File	128 KB
manage	7/12/2022 6:17 PM	Python File	1 KB
requirements	7/24/2022 2:23 PM	Text Document	1 KB

2. Install Mysql server, or xampp on your pc, start both apache and sql server
3. Make a new Database called "doctor_app"
4. Then open the terminal of your coding software or from your pc. Type this command:
"pip install -r requirements.txt"
5. After installing the libraries, we will type these commands. "python manage.py makemigrations" and then "python manage.py migrate"
6. Then type this command "python manage.py runserver". Our local server is running now. Just browse the address <http://127.0.0.1:8000/> on the web browser, register and login into your account. That's it. The admin will be made manually from the database. That's it.
